

## **TRABAJO PRACTICO DE LA UNIDAD N° 1:**

### **Traducir:**

#### **Exercise 1:**

A program  
An instruction  
An algorithm  
A channel  
A disk  
The diskette  
The result  
The data  
The hardware  
The software  
The index  
The series  
A series  
The bases  
The axes  
The command  
The statement  
The screen  
The process

#### **Exercise 2:**

An electronic machine.  
A modern science  
An analog computer  
A magnetic tape  
A dual function  
The old datum  
The bad data  
A binary counter  
The new program  
A terminal equipment  
A chain code  
The memory locations  
The error messages  
The set of characters

#### **Exercise 3:**

The supervisor's order  
The computer's memory  
An analyst's work  
Mr. Perez' system

Mrs. Jones' tasks

**Exercise 4:**

A new data set

The expensive IBM system software

Computers and programmer's abilities

The old and modern virtual machine

The task and storage management

**Exercise 5:**

1. Mary is an operator
2. It is in the computer
3. We are the new programmers
4. They weren't analysts
5. Will they be there?
6. The sentence was clear
7. The short statement is here
8. The terminal equipment is heavy
9. It is old information
10. The new site is in the Web
11. He will be an engineer
12. Was he the web designer?
13. Were you a programmer?
14. Wasn't it the right number?
15. Messages are not important
16. Programmers will be explicit
17. The notebook was small
18. Computers are special electronic machines
19. Were they the old programs or the new?
20. Laser printers are cheap
21. The screen is empty
22. Constants are numeric values
23. The program is in the computer's memory
24. Visual Basic is a special language
25. Space between words is not critical
